

REMARKS

This case has been carefully reviewed and analyzed in view of the Office Action dated 26 April 2005. In the Official Action, the Examiner objected to the Drawings under 37 C.F.R. § 1.83(a). The Examiner indicated that the “radar sensor to be exposed to face a rear area behind the vehicle” recited in Claim 1, and “a magnet” recited in Claim 6 must be shown in the Drawings or the features cancelled from the Claims. Accordingly, the Applicant has cancelled those features from the Claims. Additionally, the Applicant has removed all reference numbers from the Claims and has amended some phrases therein to clarify the recitation of the claimed subject matter. No new matter has been introduced by these changes.

The Examiner indicated in the Official Action that Claims 1-8 would be allowable if the objections to the Drawings were overcome. Thus, based on the foregoing amendments, the Applicant now believes that the subject Patent Application has been placed in a condition for allowance, and such action is respectfully requested.
